MARIO ALBERTO GUTIÉRREZ COVIAN

Full Stack Software Engineer
+52 (312) 1031850 | marioagtzc@hotmail.com | **GitHub** | **LinkedIn** | **Bold Profile**

PROFESSIONAL SUMMARY

Software development with experience in backend APIs and microservices using Node.js. Experienced in designing and deploying serverless architectures on AWS, using services like Lambda, Lex, API Gateway, DynamoDB, S3 and CloudWatch. Comfortable working with both SQL and NoSQL databases.

KEY ACHIEVEMENTS

- Implemented Amazon Lex conversational bots integrated with Connect and Lambda, automating customer interactions and reducing manual support workload.
- Enhanced IVR call flows and routing login in Amazon Connect, improving user experience and reducing call handling time.
- Led backend improvements and bug fixes that increased system stability and reduce production issues.
- Collaborated on full-stack features using React and Redux, improving data flow efficiency and frontend performance.
- Build a Python/Django microservice that generated vector embeddings from unstructured files, enabling semantic search and improving search result relevance while reducing query response time through optimized data retrieval.

TECHNICAL SKILLS

- **Languages:** TypeScript (4 years), JavaScript (5 years), Python (2 years), Java (1 year)
- **Backend:** Node.js, Express.js, Nest.js, REST APIs, Django
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, HTML5 CSS3
- **Databases:** MySQL, MongoDB, PostgreSQL, DynamoDB, Redis, Firebase
- **Cloud & Serverless:** AWS (Lambda, Lex, CloudWatch, API Gateway, Connect, S3), Docker
- **Other:** Git, Postman, Swagger, Agile/Scrum, Microservices Architecture, AI (GitHub Copilot, Claude, ChatGPT)

PROFESSIONAL EXPERIENCE

Backend Software Engineer
TECHBRIDGE IT | Remote | April 2022 – Current

- Developed backend systems with TypeScript for robust, maintainable software.
- Designed and implemented Lex bots to enhance customer experience.
- Managed Lambda updates for better performance and scalability.
- Optimized call routing and workflows in Connect.

- Conducted performance analysis and testing on the Connect platform.
- Provided bilingual support and refined Spanish language options.
- Microservices maintenance in Python and Java
- Managed an AI-powered context management microservice utilizing AWS Bedrock to automatically generate intelligent summaries of chat conversations between guests and agents

Full-Stack Developer
TATA CONSULTANCY SERVICES | Remote | November 2020 - April 2022

- Collaborated with front-end developers to design functional, cohesive code, enhancing user experience.
- Conducted data analysis to create efficient APIs for seamless system communication.
- Built new sections with React templates, optimizing data retrieval from AWS APIs using Redux.
- Set up development and production environments with AWS toolsets for streamlined deployment and scalability.
- Designed and managed database structures to ensure smooth information flow and data integrity.

Full-Stack Web Developer
KIOSCOMÁTICO | On-site Colima | February 2020 - November 2020

- Developed and maintained web applications with PHP and Node.js, focusing on performance, security, and scalability.
- Implemented RESTful APIs using Node.js, Express, and MySQL for backend development.
- Created a custom React components library to enhance code reusability and maintainability.
- Utilized React Hooks and Redux for consistent state management and user interface experience.
- Designed and developed mobile applications with Flutter for cross-platform compatibility.
- Integrated Bloc pattern for efficient state management in Flutter applications.

EDUCATION

Bachelor of Software Engineering
Universidad de Colima – Facultad de Telemática | Graduated August 2020

LANGUAGES

- **Spanish:** Native
- **English:** Professional Working Proficiency **(C1)**
